

Introduction to Machine Learning

Exam

The final exam will be held on the platform <https://contest.yandex.ru/>. Students will be suggested to solve several problems. To register on this platform one needs a Yandex account.

The platform supports several mechanics:

- single choice;
- multiple choice;
- numeric answer;
- programming.

The programming question requires to write some code in Python. All problems are checked automatically, and students can see their marks immediately. The total sum of marks for all problems is 40 points.
